CBI and Prevent Blindness of Wisconsin

CBI’s own Dr. Luxme Hariharan had a great time with Prevent Blindness of Wisconsin at the Madison Children’s Museum for the Great Glasses Play Day! CBI is working with Prevent Blindness to develop a significant statewide policy to provide quality eye screenings in Wisconsin’s schools. It’s great to work together toward a common cause to serve the children of Wisconsin.

CBI currently holds school vision screenings throughout the Madison area, and globally in Paraguay and India. We are excited to help bring much needed school vision screenings to the rest of Wisconsin’s children as well.

Bem Vindo a Madison

Combat Blindness International is excited to announce a new partnership with the University of Wisconsin-Madison and the University of Sao Paulo. This partnership is an educational exchange involving a first year ophthalmology resident from Sao Paulo training at the UW. During their training at the UW, the student will work with CBI to learn how to provide eye care to local isolated populations and give back to their communities. The first resident will arrive in the Fall of 2017.

Back to Botswana

This coming June is the second of six missions in our campaign to #BringSightToBotswana. Previously, 505 cataract surgeries were provided during the initial mission in November 2016. Earlier this year, our friends and partners at Dr. Shroff’s Charity Eye Hospital (SCEH) hosted an ophthalmologist and ophthalmic nurse from the Scottish Livingstone Hospital in Molepolole, Botswana, the site of this next mission, at their facility in New Delhi, India to get a head start on relationships and training. This was made possible by a partnership with the India Ministry of External Affairs.

Ending preventable blindness and visual impairment is one of the biggest ways that you can create a lasting impact in the world. We can accomplish a lot with as little as $25.
Save the Date!

World Sight Day Gala

We invite you to explore your senses as we host a blindfolded beer, tea, cheese and chocolate tasting. This tasting will be a guided experience of life without sight as you smell, taste and feel some of the best products Madison has to offer.

We look forward to seeing you there!
